- Wordpress Development
- ReactJs
- NodeJs
- Ajax / JSON / REST
- MySQL / Sequelize
- Strong communication skills
- Ability to multitask
- Ability to work across multidisciplinary teams

Front End Web developer with experience as an Information Architect. Skills in HTML, CSS, and JavaScript and strengths in user experience design, problem-solving and teamwork. Successfully created web development standards for IBM's internet and intranet, which lead to consistency across the company's entire web presence. I am passionate about creating web-based applications that are intuitive and user-friendly and am excited to develop front end responsive websites. Positioned well to provide unique perspectives on how end-users interact with websites and software platforms by leveraging my background in UI design.

EXPERIENCE

Personal Chef and Educator
Culinary Healing | Durham, NC | January 2004 - Present

- Provide health-supportive personal chef services and classes to private clients; Develop menus, controlled food costs and oversaw quality, sanitation and safety processes
